

A commitment to

## research & technology

Dedicated to advancing the science of all natural, phytogetic technologies for their health, performance and environmental benefits within agriculture and animal nutrition

### We bring together:

- the technical expertise to develop well researched and proven technologies
- a sales and distribution staff committed to timely, efficient customer service
- 100% all natural technologies recognized worldwide for dependable results

## All Natural technologies for agriculture and animal nutrition

---

DPI GLOBAL has a worldwide reputation for leadership and innovation in the science of all natural, phytogetic technologies for their health, performance and environmental benefits within agriculture and animal nutrition. For nearly 45 years, our strong performance product line has benefited environmental management, livestock producers and domestic animal owners, as well as those working in specialized areas of horticulture, including commercial growers, golf courses, and home owners.

We believe our on-going success is built upon the principle of combining the latest advances in research with modern application technology to meet the ever-changing demands of our target markets. Since beginning in 1965, new developments in DPI GLOBAL products have followed in virtually every year.

## Worldwide research leader

---

DPI GLOBAL has a worldwide reputation for leadership and innovation in the science of all natural, phytogetic technologies because each of our products is based upon extensive research conducted under highly controlled laboratory conditions. Our products have stood up to extensive independent university testing *plus* the test of time in the global commercial marketplace. Several hundred controlled studies have been conducted to build our extensive research database and prove the health, environmental, and performance benefits of our technologies.

We continually work with key individuals around the world evaluating new scientific information. This research led to DPI GLOBAL being the first company to successfully introduce science-based, saponin-technology products into the marketplace and to demonstrate their consistent environmental and performance benefits. You can realize these benefits in our unique all natural, phytogetic technologies.

Annually, we reinvest a significant portion of our profits back into research and technology. This investment allows our on-staff Ph.D. nutritionists to accurately determine the current needs of the marketplace, and to then direct research towards the most beneficial results. Evaluating and adapting the technology of DPI GLOBAL products into your operation can be accomplished easily thanks to our extensive, targeted program.

## Highest return value

Each and every one of our products is value-based and targeted to the unique requirements and environments of specific species. This means you can use every DPI GLOBAL waste and odor control product with the highest degree of confidence in their efficacy, consistency and reliability.

Many of the independent and university tests of our products have used both traditional and competitive products for comparative measurement benchmarks. As a result, we have built an extensive data library of how our waste and odor control products perform, as well as how they can impact the results in a wide spectrum of agriculture and animal nutrition operations. The best measurement of a product's return value is how it works for you. That's why we readily share our test results and corresponding economic data.

All DPI GLOBAL products are formulated and packaged for maximum application practicality, whether wet or dry; whether you are adding it to feed or spreading it; whether it is used alone or blended with another product.

## Best possible customer support

In addition to providing you with the highest value products, DPI GLOBAL employees are individually dedicated to serving you in a timely and efficient manner. Their professionalism, knowledge and character are evident throughout the buying process.

- You have access to all the available tools and marketing support literature, including newsletters, technical bulletins, marketing summaries, value proposition models, etc. The Micro-Aid Value Proposition Model for Building and Conserving Equity – A Whole Farm Approach helps production systems identify those action plans that are best suited for their unique situation in today's economic conditions.
- Your questions about our products and shipping will be answered quickly and accurately. The distributor representative you talk with will help you select the product best matched to your needs. Information follow-up is always fast and timely.
- Your order will be quality checked, efficiently packaged, and fulfilled as fast as possible.

In summary, our goal is to create a completely positive purchasing transaction for you, and to create a mutually beneficial long-term relationship with each of our customers.

### 100% natural

Our products are 100 percent natural and environmentally safe because "We Care" about you, your families, your neighbors and the environment. Every product offered by DPI GLOBAL is guided by the principles of benefiting you, our customer, and supporting your efforts to improve the environment.

Micro-Aid® in all feed, all the time

# Product Overview

## MICRO-AID®

MICRO-AID® – All natural, environmentally safe product offered in either a dry, granular or liquid form. Proven through extensive research to reduce ammonia and other noxious gases (i.e., sulfides and phenols). Enhanced air quality improves animal performance and promotes better health and welfare for animals and workers. Furthermore, serves as a digestion aid in livestock, industrial, municipal and residential waste management systems for solids and odor control.

## COCCI-GUARD®

Cocci-Guard® – All natural, environmentally safe feed additive proven to effectively control all six primary *Eimeria* species of coccidia. Reduced coccidiosis allows for improved animal health and performance. Note: Cocci-Guard® sales are limited to countries in which it is registered.

## Endurance D.R.O.™

Endurance D.R.O.™ – All natural, palatable, and nutritionally sound feed supplement (pelleted form) that has been proven to eliminate unpleasant odors including ammonia, sulfides and phenols. Also, promotes a healthier gut environment.

## Odor-Bloc® Equine Stall Odor Eliminator

Odor-Bloc® Equine Stall Odor Eliminator – All natural blend of Odor-Bloc® technology and natural absorbents proven to control fecal and urinary odors at their source. Granular product sprinkled on top of normal bedding to quickly penetrate and provide an odor protective blanket.

## Odor-Bloc® Cat Litter Deodorizer

Odor-Bloc® Cat Litter Deodorizer – All the benefits of Equine Stall Odor Eliminator adapted to domestic pet use.

## TempCon

TempCon – All natural grain conditioner whose surfactant properties improve nutrient availability and digestibility of grain based animal feeds.

## AQUA SPARKLE®

Aqua Sparkle® – All natural, water soluble cleaner used in pools and other water systems to deodorize, soften, prevent grease and scale buildup, and improve the overall cleanliness and quality.

## SSO®

SSO® – All natural surfactant derived from phytogetic compounds that provide faster, deeper water penetration in compacted soils, while also improving aeration. For use with row and field crops.

## Penetrate w.n.g.®

Penetrate w.n.g.® – A natural-based wetting agent and soil penetrant proven to assist in the management and conservation of water by ensuring uniform movement and distribution of water throughout the root zone. Use in place of chemical wetting agents that may be undesirable due to environmental, regulatory or compatibility concerns.

DPI GLOBAL has been part of the agriculture industry for nearly 45 years. We are a stable, well-respected company with a strong performance product line. Our corporate headquarters, manufacturing facilities and quality control laboratories are located in Porterville, California. We welcome any ideas or communication from you that might assist us in finding a better way to serve you and your needs. Should you have any questions regarding us, our products, or the name of your nearest distributor, please contact us and we'll make every effort to respond to you as soon as possible.
